

Power Sports by Exodus

Specifications:

Part Number: PSE-08250M

Replacement for lead acid:

YT14-BS (Positive on the Left)

(Note: this battery replaces YTX, GTX, ?TX, etc..)

Voltage: 12V

Capacity: 8-16 Amp Hours (Ah)

Cold Cranking Amps: 250 CCA

Case: ABS

Connector: Nut and Bolt

Dimensions: 5.82 in. x 3.42 in. x 5.7in. (149 mm x 87 mm x 145mm)

Weight: 2.42 lbs. (1.1kg.)

Charging: Charges with traditional lead acid charger or can charge with lithium charger. (Exodus stocks lithium chargers).

Note: Installed this lithium battery will discharge less than 10% in a year when not in use. Built-in protection circuit module (PCM) that provides balancing of internal cells, and protection from overcurrent, undervoltage (overdischarge), and overvoltage.

- Does not sulfate and ruin paint. Maintains a charge much longer than a lead acid battery.
- Includes built-in PCM (protection circuit module) which provides balancing of internal cells, and protection from overcurrent, undervoltage (overdischarge), and overvoltage.
