

Power Sports by Exodus

Specifications:

Part Number: PSE-08250MS

Replacement for lead acid:

YTX14H, YTX14H-BS, YTX16-BS (Positive on the Left)

(Note: this battery replaces YTX, GTX, ?TX, etc..)

Voltage: 12V

Capacity: 12-18 Amp Hours (Ah)

Cold Cranking Amps: 250 CCA

Case: ABS

Connector: Screw

Dimensions: 5.87 in. x 3.82 in. x 5.71in. (149 mm x 87 mm x 145mm)

Weight: 3.09 lbs. (1.4kg.)

Charging: Charges with traditional lead acid charger or can charge with lithium charger. (Exodus stocks lithium chargers).

Note: Installed this lithium battery will discharge less than 10% in a year when not in use. Built-in protection circuit module (PCM) that provides balancing of internal cells, and protection from overcurrent, undervoltage (overdischarge), and overvoltage.

- Does not sulfate and ruin paint. Maintains a charge much longer than a lead acid battery.

- Includes built-in PCM (protection circuit module) which provides balancing of internal cells, and protection from overcurrent, undervoltage (overdischarge), and overvoltage.
